

My concern relates to discussion within the FCC to place priority on Low Power FM stations over existing FM translators. Within the Chicagoland area, we are served by the non-profit FM translator station of K-LOVE radio. K-LOVE reaches people in an effective way that may have become a burden to society if it were not for K-LOVE. By placing priority to the Low Power FM stations, K-LOVE would not be able to operate as the efficiencies of the FM translator would be lost. Thank you for your consideration. Jason S Inman
